

Product code: MN09ch

Description: FLAT-6 20k rpm, different opening case, 8mm front shaft length

New product / replacement: Replaces MN09c and MN09h

- The new version of the standard Flat-6 motor has two different case sides, open and close, merging the 'open' and 'closed' can motors in one single, double face convenient engine.
- The shaft, on the pinion side, is shorter than in the older versions, thus leaving more space for wheels when motor is installed in Anglewinder position.
- This motor is used as stock on all the Slot.it 'GT' and 'LMP' models.
- Stall torque: 200 g*cm
- Maximum speed: 20500 rpm
- Label colour: yellow
